Statistical Register of South Australia, 1934-35.

PREFACE.

The Statistical Register is divided into five parts as follow:—

Part I.—Social—Administration, Justice, Education, Hospitals, Charities, etc.
II.—Population and Vital
III.—Finance—State, Local Government, Banking, etc.
IV.—Trade, Transport and Communication
V.—Production

while a Statistical Summary of South Australia for the years 1836 to 1934-35 inclusive is attached at the end of the volume.

Since in most cases considerations of space do not permit of a verbal analysis of the figures, it has been necessary in certain tables to append explanatory notes at the bottom of the page. Careful attention is drawn to these notes since they will generally be of considerable assistance in interpreting the published figures.

My thanks are tendered to the various heads of State and Commonwealth Departments for their co-operation in furnishing statistical data, often at considerable inconvenience.

I desire also to express my appreciation of the services of Mr. H. L. Semmens, Assistant Government Statist, and of the staff of compilers and other officers for their careful attention to intricate details in the compilation of the various sections of this volume.

30th September, 1936. A. W. BOWDEN, Acting Government Statist, &c.

BIRTHS.

Numbers for State.—In 1934 the births registered numbered 8,459 (8,900), a decrease of 441. The number had fallen steadily from 11,492 in 1927 to 8,521 in 1932. There was a pleasing increase of 379 to 8,900 in 1933, but, despite the increase in marriages during the last three years, this increase in births was more than lost in 1934.

Numbers Metropolitan Area and Country.—The births for the city and suburbs for 1934 numbered 3,783, and for country districts 4,676, the respective rates per 1,000 mean population being 12·07 and 17·32. NOTE.—Births are classified according to the usual residence of the mother.

Multiple Births.—Twin births numbered 73 (70) sets. Males 75 (63) and females 71 (77). There were two triplet births in 1934, being the first since 1929. In 1919 there was one quadruplet birth of four males, and for the ten years 1925 to 1934, seven triplet births and 1,048 twin births. In 1882, there was one quintuplet birth (1 male, 4 females) of whom 4 died in 5 minutes and 1 in 2 days.

Sexes.—Males numbered 4,354 (4,651) and females 4,105 (4,249). The males always exceed the number of females born, the average number of males born to every 100 females for 1934 being 106·07 (109·46).

Ex-Nuptial Births.—252 (284) were registered during the year. The percentage on total births registered was 2·98 (3·19). The percentage of ex-nuptial births in this State for many years has been much lower than that of any of the States or New Zealand.

Legitimations.—18 (31) were legitimated under the Act during the year.

Still-Births.—In this State the law does not at present provide for the registration of still-births. Certificates of the stillborn are issued by the Departmental Registration Officers for Maternity Allowance, and from this source the following numbers have been ascertained. They give an indication of the probable number for the State :—1925, 296 ; 1926, 317 ; 1927, 285 ; 1928, 290 ; 1929, 334 ; 1930, 232 ; 1931, 184 ; 1931 figures are incomplete as from 22nd July, the allowance being only paid where income did not exceed £260 per annum. From 5th October, 1932, the income limit was reduced to £208, and the applications for the year were 217 ; 1933, 194 ; and 1934, 168.

Adoptions.—The Adoption of Children Act was brought into operation in October, 1926 ; for the balance of that year 163 were adopted :—1927, 206 ; 1928, 130 ; 1929, 119 ; 1930, 102 ; 1931, 89 ; 1932, 97 ; 1933, 98 ; 1934, 78.

Natural Increase.—The annual natural increase—excess of births over deaths—for the five years 1930-1934 was ·69 percentage of the population. For the five five years immediately preceding (1925-1929) it was 1·12 per cent., and for the pre-war period (1910-1914) it was 1·77 per cent. For the year 1934 it was 0·52 (0·69) per cent.

Crude Birth Rates.—The birth rate per 1,000 of mean population for 1934 was 14·50 (15·32), being the lowest on record. Prior to the increase for 1933, each succeeding year of the previous ten years had been the lowest in the record of the State. Fortunately the death rate has also fallen and slightly lessened the effect of the rather substantial fall in the crude birth rates. For the five years' period 1910-1914 (just prior to the war) the annual birth rate averaged 27·98 per 1,000 of mean population ; for 1915-19, 25·51 ; 1920-24, 23·43 ; 1925-29, 20·16 ; and 1930-34, 15·54. The average rate for the five years' period 1930-34 represented a fall of 12·44 over the period 1910-1914.

Birth Rates in Australasia.—The following statement shows the birth rate per 1,000 of the population in each of the Australian States and in New Zealand for the last five years :—

1934	16·52	15·20	18·16	14·50	17·68	19·51	16·39	16·47

The birth rate in England and Wales was 14·4 in 1933.

Since the crude birth rate is calculated with reference to the total mean population, it is obvious that it will be affected by any marked change in the age and sex distribution of the population over a period of years. Therefore, although such a rate gives a fairly reliable measure over a small period of time, it would not reveal the true position when comparison is made over a long period.

A more accurate comparison may be made by means of a birth rate per 1,000 women at the principal child-bearing ages. This rate refers all births (nuptial and ex-nuptial) to all women at the given ages (married and single). It would be still more accurate to have two rates (*a*) nuptial rate, (*b*) ex-nuptial rate, but space does not permit of a more detailed analysis.

MARRIAGES.

Number of Marriages.—4,310 (3,973) marriages were registered for the year 1934, an increase of 337, or an increase of 1,241 during the last three years, but still 193 less than the record number of 4,503 in 1926. The rate per 1,000 mean population was 7·39 (6·84).

Officiating Ministers.—At the close of the year there were 715 Ministers of Religion and 25 Registrars enrolled with power to celebrate marriages. The Act provides that when a marriage is celebrated by a minister, he must send within seven days, one certificate to the District Registrar and one certificate with licence, &c., to the Registrar-General, and at the end of each quarter a statement of all the marriages celebrated by him during such period.

Of the total marriages for the year, Methodist Ministers celebrated 1,349, or 31·3 per cent.; Church of England, 975 or 22·6 per cent.; Roman Catholic, 447 or 10·4 per cent.; the Registrars celebrated 415, or 9·6 per cent. Civil marriages increased from 247 to 419 during the previous six years, falling to 415 for 1934.

The following table gives further particulars :—

Conjugal Conditions of those Marrying.—Bachelors 3,949 (3,640), spinsters, 4,087 (3,766), widowers 284 (263), widows 151 (134), divorced men 77 (70), divorced women 72 (73).

Of the 3,949 (3,640) bachelors, 3,836 (3,536) married spinsters, 65 (56) married widows, and 48 (48) married divorced women.

Of the 284 (263) widowers, 196 (179) married spinsters, 74 (68) married widows, and 14 (16) married divorced women.

Of the 77 (70) divorced men, 55 (51) married spinsters, 12 (10) widows, and 10 (9) divorced women.

Ages of those Marrying.—The numbers marrying at each of the following age groups were :—Under 21 years of age, 192 males, 803 females; 21 years and under 45 years, 3,858 males, 3,377 females,; 45 years and upwards, 260 males and 130 females. Total 4,310 males, 4,310 females.

The mean age of those marrying for the year was for males 28·85 (28·16), and females 25·46 (24·80). These means have only varied by decimal points for years.

Numbers Over 70 Years of Age.—During the year 23 (18) persons married being over the age of 70 years, 18 were males and five females.

Marriages of Minors.—The written consent of a parent (the father if alive) is necessary in the case of a marriage of a person under 21 years of age. During the year 995 (1,039) minors were married representing 11·5 (13·1) per cent. of the total persons marrying. The numbers at each age were as follows :—

	13.	14.	15.	16.	17.	18.	19.	20.	Total.
Males	— (—)	— (—)	— (—)	— (1)	7 (7)	27 (30)	60 (58)	98 (124)	192 (220)
Females	— (—)	1 (—)	4 (4)	37 (24)	73 (97)	172 (179)	224 (248)	292 (267)	803 (819)

Divorces.—189 (163) marriages were dissolved by divorce and decree of nullity during the year. The increase has been considerable since the war. For the five years 1910-1914, the annual average was 12·2 1915-9, 19·0 ; 1920-4, 73·2 ; 1925-9, 94·8 ; and for the five years, 1930-34, 155·4.

Marriage Rates per 1,000 *of Mean Population.*—The annual rates per 1,000 of mean population for quinquennial periods from 1905-1934 and the years 1932 to 1934 were as follows :—

Period.	Rates.	Period.	Rates.	Period.	Rates.
1905-1910	7·93	1920-1924	8·55	1932.....	6·29
1910-1914	9·38	1925-1929	7·54	1933.....	6·84
1915-1919	7·94	1930-1934	6·33	1934.....	7·39

The marriage rate for 1934, 7·39, is higher than the six previous years, but the 1934 rate and also the annual mean for the five years ended 1934 are lower than the annual mean of the five years ended 1929, 7·54, which was lower than the four preceding quinquennial periods. The pre-war period 1910-1914 had the high annual average of 9·38.

Marriage Rates in Australasia.—The following statement shows the marriage rate per 1,000 of the population in each of the Australian States and in New Zealand, for the last five years :—

DEATHS.

Numbers for State.—The deaths registered during the year numbered 5,403 (4,904), an increase of 499 and 475 more than the mean of the five previous years. The exceptionally hot weather in the early months of 1934 was an influence in increased deaths from diseases of the heart, 956 (816) ; senility, 370 (315) ; and diarrhoea 76 (33) ; besides which 31 (—) deaths were definitely attributed to excessive heat. During the spring there was an epidemic which was a factor in increased deaths from pneumonia 402 (326), influenza 51 (34), bronchitis 86 (69), and these deaths were also contributing causes in a number of deaths from diseases of heart.

Males numbered 2,835 (2,638), and females 2,568 (2,266).

Metropolis and Country.—3,353 deaths were classed to the metropolitan area and 2,050 to the remainder of the State. The rates per 1,000 population were—Metropolis, 10·69 ; remainder of State, 7·59.

NOTE.—Deaths are classified according to the usual residence of the deceased person.

Crude Death Rate per 1,000 *of Mean Population.*—The death rate of total registrations for 1934 was 9·26 (8·44) . The rate for 1933 had been the lowest on record and it is gratifying to record that there had been a substantial decrease in the rate during the fourteen years from 11·69 in 1919. See paragraph above *re* increased deaths for 1934.

The annual mean rate per 1,000 of population for the quinquennial period, 1900-1904, was 10·99. For the period 1920-1924 it fell to 9·68, 1925-1929 to 8·98, and 1930-1934 to 8·65, a decrease of 2·34 from 1900-1904. This fall helped to counter the effect of the regrettable fall in the birth rate upon the net natural increase in population. The net natural increase fell from an annual mean of 14·06 per 1,000 of population for the years 1900-1904 to 6·89 for the years 1930-1934, a decrease of 7·17.

Death Rate of Sexes.—The annual mean crude death rates for the period 1900-1904 was 12·04 per 1,000 of population for males and 9·94 for females, and for the period 1930-1934, 9·21 for males and 8·08 for females. The death rate of males is thus seen to be much higher than for females and to have fallen since the period 1900-1904 by 2·83 and females by 1·86 per 1,000 of population, equal to 23·51 per cent. for males and 18·72 per cent. for females.

The following are the particulars for the period 1900 to 1934 :—

The death rate in England and Wales was 12·3 in 1933.

Index of Mortality.—Over a long period of years, the crude death rate is open to objection when used as a measure of the vitality or mortality of the population. Mortality can properly be examined only with reference to the age and sex distribution of the population. Analysed mortality tables are now in course of preparation for the Commonwealth Statistician and, when these are available, it will be possible to give a true measure of the great increase in the longevity of the population over the past two decades.

The expedient is often used of substituting for the crude death rate a " standardised death rate " or " index of mortality." Such a rate is shown in the following table, in which the differences in the age and and sex constitutions of the populations of the six States have been taken into account in computing their respective indexes of mortality. The results for each are based upon a standard population, distributed according to sex, into eleven age-groups. This table may be taken as a fairly reliable measure of the relative total mortality of different States during the period 1929 to 1933.

Deaths of Centenarians.—The deaths of 1 male at 104 and 4 females (3-100, 1-102) were registered for the year. The previous year there were 3 males (1-100, 1-102, 1-105) and 1 female at 100.

Deaths in Age-Groups.—301 (286), or 5·57 (5·83) per cent., of the total deaths occurred within the first year of life, and 414 (385), or 7·66 (7·85) per cent., within five years of life, 613 (564), or 11·35 (11·50) per cent. of the total were under 30 years of age, and 2,221 (2,031), or 41·11 (41·42) per cent., were 70 years and over. The following are the particulars of the deaths in age-groups :—

Causes of Death.—The Statistical Classification of the Causes of Death adopted is in accordance with the International List of Causes of Death as revised in 1929. Previous to 1931, the 1920 revision had been used.

The number of deaths, male and female, from each of the causes set forth in such list, and the age-groups decided upon by the Conference of Statisticians and Health Authorities in 1928, have been classified and may be found in Tables Nos. 43 and 45 of this Section of the Statistical Register. The principal causes only can be referred to in this report, and are set forth in the following table. The percentage of each to the total deaths and the rates of each per 10,000 of population are also shown.

Diseases of the Heart.—From the foregoing it is noted that diseases of the heart, account for the greatest number of deaths, though the rate per 10,000 of mean population from 1910 to 1930 varied but little except during the war period when it increased. In quinquennial periods the average annual rates per 10,000 of population were :—1910-1914, 11·11 ; rising in the war period 1915-1919 to 12·16 ; 1920-1924, 10·69, 1925-1929, 10·53 ; 1930-1934, 13·94. It is probable that nearly two-thirds of the substantial increase since 1930, and decreases under senility and ill-defined diseases, are the result of the movement initiated for more definite medical certificates, the better classification having proved the 1930 and previous figures to have been understated.

For the year 1934 the deaths totalled 956 (816), increase 140, the number being equal to 17·69 (16·64) per cent. of the total deaths and 16·38 (14·04) per 10,000 of the mean population. The exceptionally hot weather in the early months and an epidemic in the spring were factors in the heavy increase for 1934.

Cancer and Tuberculosis.—Up to the year 1917, with the exception of the year 1914, the death rates from cancer were less than from tuberculosis of all kinds, but from that year to the present the death rate from cancer has generally increased, whilst the death rate from tuberculosis (all kinds) has generally decreased. In 1910 the death rates from tuberculosis of the respiratory system fell below those of cancer and have continued to fall, whilst the rates for cancer continued to rise. These fluctuations are seen in the graphs on page 10.

The following are the comparative particulars for the years 1910 to 1934 :—

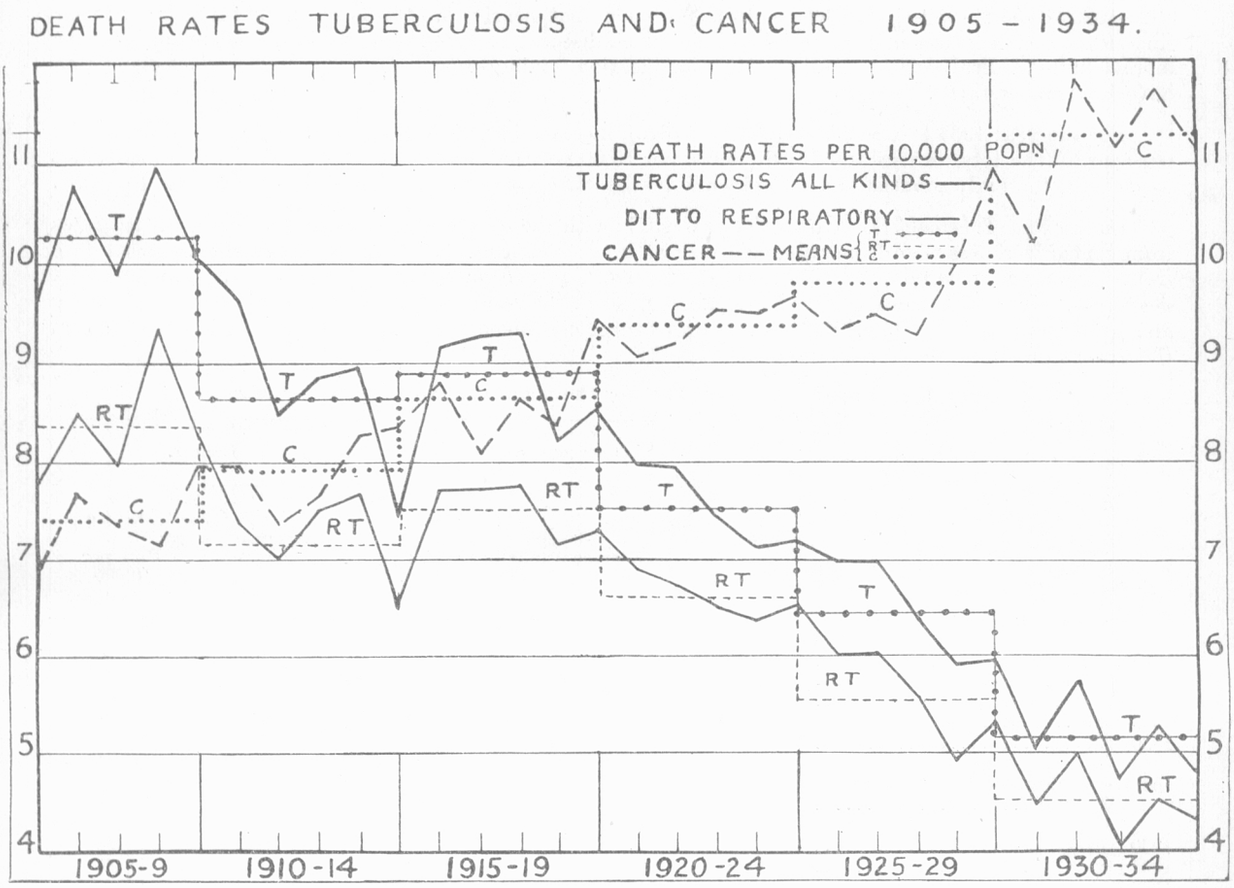
1934 (")	281	4·82	4·32	651	11·16

From the foregoing table it is noted that the deaths per 10,000 of population from tuberculosis averaged annually 8·65 for the period 1910-1914, and those for cancer 7·94, or ·71 less than tuberculosis, whilst the annual averages for the last five years, 1930-1934, were—Tuberculosis, 5·14 and cancer 11·29, the rate for cancer being 6·15 above tuberculosis for the latter period, whilst for the year 1934 the average per 10,000 of population from tuberculosis was only 4·82 (5·22) and from cancer 11·16 (11·69).

Tuberculosis of the Respiratory System.—Out of the total deaths from tuberculosis of all kinds 281 (303) for the year 1934, tuberculosis of the respiratory system caused 252 (262) deaths, or 90 (86) per cent. The rates for the two years were 1934, 4·32; 1933, 4·51 ; a considerable fall on previous years. For the period 1910-1914 it was 7·18, or greater by 2·68 per 10,000 of population than in the period 1930-1934.

Cancer—Seat of Disease.—Cancer of the stomach and duodenum 157, 97 males and 60 females, breast 67, male genital organs 61, and uterus 42, are the chief seats of the disease. Of the total cases of deaths from cancer—651, the respective proportions were 24·12, 10·29, 9·37 and 6·45 per cent. Further details are shown in Returns Nos. 40 and 41.

The annual rates and quinquennial means, per 10,000 of mean population for both tuberculosis and cancer for each of the years 1905 to 1934 are shown in the following graph :—



Explanation of Graph.—The figures to the left and right of the diagram represent the rates per 10,000 of mean population, and these rates are plotted for each of the years 1905 to 1934 with the means for each of the quinquennial periods 1905-9 to 1930-1934 marked off at base. The letters " C " signifies cancer, " T " Tuberculosis of all kinds, " R.T." Tuberculosis of the Respiratory System.

Tuberculosis, Cancer, Heart Diseases and Nephritis.

It has previously been pointed out that the crude death rate is not an accurate measure of mortality, which can be properly examined only with reference to its incidence at individual ages. This is even more important when comparing the effect of different diseases, which fact may be illustrated by the table hereunder showing the average mortality over the last three years per 10,000 of population at decennial age groups. No attempt has here been made at statistical refinement, but the table may be taken as giving an approximate measure of the relative incidence of mortality from the causes specified at various ages.

The table may serve to illustrate the heavy mortality from Tuberculosis at ages under 50, the heavy rate for females at ages 20-29 being outstanding.

Since mortality decreases rapidly during the first five years of life, the death rate from tuberculosis has been prepared for age-groups 0-4 and 5-9 as follows :—

Age-Group.	Males.		Females.	
	Tuberculosis.	All Causes.	Tuberculosis.	All Causes.
0-4	2·44	98·52	1·81	82·53
5-9	0·49	11·83	0·76	10·39

Too much reliance cannot, however, be placed in the death rate at group 0-4, since here the group rate is an average of a rapidly changing mortality. The same criticism applies throughout, but the effect is significant only at the extreme ages.

Pneumonia (*including Broncho-pneumonia*).—Total deaths 402 (326), rate 6·89 (5·61). The annual rate for the period 1910-14 was 5·15, and for the period 1930-34, was 5·95, an increase in the latter period over the earlier of 0·80 per 10,000 of population. Broncho-pneumonia deaths were 202 (182), and Lobar, 188 (131).

Bronchitis, Acute, Chronic, and Unspecified.—Total deaths 86 (69), rate 1·47 (1·19). Bronchitis averaged annually the five years 1930-1934, 1·25 per 10,000 population, and 2·93 for the years 1910-1914, a decrease of 1·68 per 10,000 of population.

Other Respiratory Diseases.—Excluding the deaths from pneumonia 402 (326) ; and bronchitis 86 (69), the total deaths from other respiratory diseases numbered 109 (101), the principal causes being—pleurisy, 18 (18) ; congestion and haemorrhage of lungs, 56 (57) ; asthma, 20 (11).

Epidemic, Endemic, and Infectious Diseases.—These classes of disease were responsible for 422 (437) deaths, which includes the 281 (303) deaths from tuberculosis already reviewed. The remaining chief causes were :—Tphoid fever 4 (2) ; whooping cough, 7 (11) ; diphtheria, 14 (19) ; influenza, 51 (34) ; dysentery, 3 (4) ; syphilis, 14 (7) ; tetanus, 13 (14).

Notifiable Infectious Diseases.—Certain proclaimed infectious diseases are notifiable under the Health Act to the Central Board of Health. A total of 6,829 (19,292) cases were reported during the year.

The principal diseases were diphtheria, 582 (877) ; typhoid fever, 20 (13) ; erysipelas, 183 (130) ; measles, 1,249 (13,469) ; puerperal fever, 43 (80) ; pulmonary tuberculosis (phthisis), 370 (383) ; scarlatina and scarlet fever, 643 (978) ; whooping cough, 1,313 (1,008) ; chicken pox, 1,099 (1,062) ; influenza, 1,280 (804) ; dysentery, 2 (5) ; mumps, 27 (454).

Cerebral Haemorrhage, Embolism and Softening.—Total, 440 (440). The annual rate per 10,000 of population for the five years, 1930-34, was 7·47. For the period 1910-1914 it was 4·75, 1915-1919, 5·60, and 1920-1924, 6·32. Thus it is seen the increase has been continuous. For 1934 it was 7·55 (7·57).

Diabetes Mellitus.—110 (116). Males 38 (46), females 72 (70). Of the total 96 (103) were 50 years of age and over.

Puerperal Diseases, Accidents of Pregnancy and Confinement.—Total 61 (48). Of this number 8 (9) were recorded as due to puerperal septicaemia, and 9 (16) to abortion with septic conditions, including 1 (2) criminal abortion. The rate is equal to 7·21 (5·39) per 1,000 live births.

External Causes.—Total 372 (282). The principal causes were—Suicides, 78 (60), equal to a rate of 1·3 (1·0) per 10,000 of population ; accidental drowning, 29 (43) ; automobile accidents, 74 (53) ; traumatism by falls, 54 (33) ; homicides, 10 (13) ; excessive heat, 31 (—).

Infantile Mortality.

There were 301 (286) deaths of infants under one year of age, an increase of 15. Excessive heat accounted directly for six of this increase, and would be a factor in the increased deaths from diarrhoea 17 (10). Infanticide accounted for 4 (1). The average per 1,000 live births was 35·58 (32·14), being the lowest except for the record in 1933, which was also the lowest yet recorded for any State. The South Australian rate for 1933 was only 0·92 more than the world record of 31·22 for New Zealand in 1932. For many years South Australia, in common with the other States of the Commonwealth and New Zealand, has had a very low mortality rate for infants under one year of age compared with other countries. But even so the economic loss to the State is considerable, for in the last 10 years, 4,341 infants died before reaching the age of one year and, in addition, 1,406 before reaching five years of age, making a total loss of 5,747 under five years of age. In other words, the State has lost by death during the last 10 years approximately one baby in every 23 born before reaching the age of one year with an additional loss before the age of five is reached. Further, there is the loss of unrecorded still-born children, approximately 300 annually. (See paragraph re still-births, page 4).

Infantile Mortality in Australasia.—The following statement shows the infantile death rate per 1,000 births in each of the Australian States and in New Zealand, for the last five years.

1930-1934	342	38·05	1934	301	35·58

The annual mean death rate of infants under one year of age for the five years 1895-1899 was 110·25 and for the five years, 1930-1934, only 38·05. Fall of 72·20 per 1,000 live births is certainly very gratifying.

Still there are points revealed by an analysis of the facts which are not satisfactory. I refer to the record of deaths under one month of age. Most of the improvement has taken place in the rates for ages above one month and under 12 months. In the tabulated summary and in the graphs the rates for deaths of infants under one month, under one week, and under one day of age are shown separately, and these show less progress.

Under one month for the period 1900-1904 the mean rate was 32·85, and 1930-34, 23·59, a fall of only 9·26, whilst for the ages one month and under 12 the rates for the same period were 59·10 and 14·46, a fall of 44·64. Further, during the last period, of the total number (1,060) dying within one month of life 839 or 79 per cent., died before reaching the age of one week, and 452 or 43 per cent. of the 1,060 were less than one day old. The great majority of those dying under one month of age died from pre-natal causes.

The annual mean number and annual mean rates per 1,000 births of infants dying within the following ages were as follows :—

Explanation of Graph.—The bases of the small rectangles represent the years, and the annual means for the quinquennial periods are also shown. The figures to right and left represent the rate per 1,000 live births.

Pre-natal Causes of Death.—Code Nos. 157—161. During the five years, 1930-34, deaths from malformations, congenital debility, premature births, and other diseases of early infancy which may be termed "Pre-natal Causes" accounted for 1,095 deaths, or 64 per cent. of the total dying within one year of age compared with 43 per cent. for the period 1910-14. Nearly all of these deaths occurred within one month of birth. Deaths from diarrhoeal diseases for 1930-34 were 127, or 7 per cent. compared with 26 per cent. for 1910-14, and other diseases 490, or 29 per cent. compared with 31 per cent.

The average percentage of loss from pre-natal causes is greater for the period 1930-34 than for the previous three quinquenniums. These facts indicate the direction in which efforts for the saving of infant life should be directed.

Sexes.—The number of boys dying before reaching one year of age for the last five years numbered 953 and girls 759, the deaths of boys being 25 per cent. greater. For 1934—of the total deaths 301 (286) —172 (157) were males and 129 (129) were females.

Care of Infant Life.—The Mothers' and Babies' Health Association, formerly called " School for Mothers Institute and Babies' Health Centre," has 49 branches in the State ; 39 of which are in the metropolitan area. The Government makes an annual grant of £2,500 to the Association. During the year ended 31st July, 1934, the nurses paid 2,717 visits to expectant mothers and 29,201 to young babies. Baby clinics are also established in the State, and during 1933-34, 93,200 examinations of babies brought by mothers were made and advice given when necessary. There is a creche in the city where babies may be left during the day whilst the mothers are earning their own living.

ANATOMY ACT, 1884.

The Inspector of the School of Anatomy reported, under Clause 6, that 10 (14) bodies had been removed to the University School of Anatomy for anatomical examination.

A. W. BOWDEN,

Acting Government Statist and Registrar-General of Births, Deaths, and Marriages.

Statistical Office, Adelaide, 1st June, 1935.

CENSUS, 30TH JUNE, 1933.

EXTRACTS FROM NOTES BY COMMONWEALTH STATISTICIAN (FOR DETAILS SEE RETURNS 10 TO 28).

Population.—The revised figures for the population of South Australia as at the Census of the 30th June, 1933, are :—Males, 290,962 ; females, 289,987 ; total, 580,949.

Age.—A satisfactory feature of the results is the very small number of cases of failure to specify the age of the person enumerated, the total number of such cases being only 974, or 0·17 per cent. of the total population of the State, as compared with 1,220 persons, or 0·25 per cent. at the 1921 Census. Of the population for whom age was stated 7·8 per cent. were under five years of age ; 9·2 per cent. from five to nine years ; 9·4 per cent. from 10 to 14 years ; 9·5 per cent. from 15 to 19 years ; and 37·7 per cent. were under 21 years. It will be seen that a smaller percentage of the population is in each younger age group descending from 15 to 19 years down to 0-4 years. Since the 1921 Census there has been a sharp decline from 10·9 per cent. to 7·8 per cent. in the proportion of the population under five years of age, and from 41·7 per cent. to 37·7 per cent. in the percentage under age 21. At the Census of the 30th June, 1933, there were actually 8,762 less children under five years of age, and 10,235 less children under 10 years of age than were in South Australia at the previous Census in the year 1921. An analysis of the numbers under the age of five years shows that the number of children under one year of age has decreased by 3,315 or 28·3 per cent. below that enumerated at the previous Census ; those between one and two years have decreased by 2,288, or 21·9 per cent. ; two and under three years by 1,235 or 12·0 per cent. ; three and under four years by 1,123, or 10·6 per cent. ; and between four and five years decreased by 801 or 7·4 per cent.

These figures reflect the extent of the decline in birthrate. Had the average effective birthrate which prevailed between the Census of 1911 and 1921 continued until 30th June, 1933, the number of children under 10 years of age in South Australia would have been 40,000 more than were actually enumerated at the Census. On the other hand, the number of persons aged 65 years and over in South Australia at the 1933 Census was 15,641 more than at the previous Census, as compared with an increase of 6,176 during the previous intercensal period 1911 to 1921.

Conjugal Condition.—At the 1933 Census, 54·3 per cent. of the population of South Australia were never married ; 40·4 per cent. were married ; 5·1 per cent. widowed ; and 0·2 per cent divorced. The proportion of males who had never been married was 56·4 per cent. and females 52·2 per cent. For every 100 females never married, there were 108 males never married at the 1933 Census, as compared with 107 males at the previous Census. During the intercensal period the number never married increased by 11 per cent. ; those married by 24 per cent. ; widowed by 36 per cent. ; and divorced by 242 per cent. At the 1933 Census there were 7·6 widowed males and 18·0 widowed females for every 100 who were married, as compared with 7·1 and 16·1 respectively at the previous Census.

Dependent Children under 16 *years of age.*—70,256 males and 5,684 females stated that they had children under 16 years of age dependent on them at the 30th June, 1933. The number of dependent children under age 16 claimed totalled 162,852, being equivalent to an average of 2·2 dependent children under 16 years for each male with dependent children, and 1·7 for each female guardian. For each adult male in South Australia the average was 0·85 dependent children, and for each male breadwinner (excluding pensioners) 0·75 dependent children.

Thirty-nine per cent. of the males with dependent children under 16 years had one child ; 30 per cent. two children ; 16 per cent. three children ; 8 per cent. four children ; 4 per cent. five children ; and 3 per cent. more than five children. Fifty-nine per cent. of the female guardians had one dependent child under age 16 ; 24 per cent. two children ; 9 per cent. three children ; 5 per cent. four children ; and 3 per cent. more than four children.

Nine thousand seven hundred and one children or 6·0 per cent. of the total dependent children under 16 years of age in South Australia were dependent on females.

Orphanhood.—The number of children under 16 years of age in South Australia at the 30th June, 1933, totalled 163,878, of whom 51 per cent. were males and 49 females. Although the number has decreased by 1,399, the sex distribution is the same as at the 1921 Census.

Of all children for whom particulars were stated 94·4 per cent. had both parents living ; 3·2 per cent. were without father ; 2·2 per cent. without mother ; and 0·2 per cent. were bereft of both parents.

Schooling.—At the 30th June, 1933, there were 97,576 children of the ages six to 14 years inclusive in South Australia. The number receiving instruction at Government Schools totalled 83,490, and at Private Schools 14,522. 17·5 per cent. of the total population of the State were receiving instruction at the 1933 Census, as compared with 18·5 per cent. at the previous Census ; 82·3 per cent. of those receiving instruction were attending a Government School ; 14·3 per cent. were attending a Private School ; and 1·2 per cent. the University ; 2·2 per cent. were stated to be receiving instruction at home.

Since the 1921 Census the number attending Government Schools increased by 12·8 per cent., while those attending Private Schools increased by only 1 per cent. It is of interest to note that about 52 per cent. of those attending Government Schools are males, and 48 per cent. females, and that this proportion is practically reversed for those attending Private Schools.

War Service.—19,975 males and 193 females served abroad with the Australian Forces during the Great War ; 11 per cent. of the adult male population of South Australia being ex-members of the Australian Forces with overseas service.

Religion.—At the 1933 Census the public was advised that there was no legal obligation to answer this question, and 95,611 persons, or 16·5 per cent. gave no reply, as compared with 11,991 persons, or 2·4 per cent. at the 1921 Census, when this option was not published. Of those who stated their religion, the Church of England had the greatest number of adherents with 164,531 (33·9 per cent.) ; followed by Methodist, 127,978 (26·4 per cent.) ; Roman Catholic 63,466 (13·1 per cent.) not including Catholic, undefined 5,979 (1·2 per cent.) ; Lutheran 26,027 (5·4 per cent.) ; and Presbyterian 25,060 (5·2 per cent.). Owing to the large increase in the number of persons who gave no reply to this question, the number of adherents for most denominations at the 30th June, 1933, is shown to be less than the number stated at the previous Census. Eighteen per cent. of the male and 15 per cent. of the female population of South Australia did not state their religion, and for every 100 males who declared they were adherents of the various denominations of the Christian Religion, there were 104 female adherents as compared with 102 females at the 1921 Census.

Birthplace.—The percentage of Australian-born in the population of South Australia showed a substantial increase during the intercensal period, and in 1933 represented 90 per cent. of the population as compared with 88 per cent. in the year 1921. The number shown as born in European countries, 52,123, shows no increase on the number (52,697) stated at the 1921 Census as born in Europe. The number born in the British Isles represented only 7·8 per cent. of the total population, as compared with 9·3 per cent. at the previous Census. The number born in Ireland decreased by 2,000 (35 per cent.) ; those born in Germany by 1,045 ; and from British India by 292. On the other hand, there was an increase of 1,145 in the number born in Italy, an increase of 891 from Scotland, and 587 from Greece.

Period of Residence in Australia.—Of those born outside the Commonwealth for whom length of residence in Australia was specified, 4·9 per cent. had resided in Australia for a period of less than five years as compared with 10·4 per cent. at the previous Census. This is an indication of the extent of the decline in overseas migration into South Australia in recent years. During the intercensal period the immigrant population decreased by 1,153 to 57,016, while the Australian born increased by 86,942 to 523,933.

Foreign Language.—At the 30th June, 1933, 1,942 persons, comprising 1,519 males and 423 females, stated they were unable to read and write English, but were able to read and write a foreign language. Thirty-seven per cent. of this number were able to read and write Italian ; 23 per cent. Greek ; 9 per cent. German ; and 8 per cent Hindu.

Nationality.—The results of the 1933 Census disclosed that 99·4 per cent. of the population of South Australia were of British Nationality, being slightly less than the percentage of 99·5 at the previous Census ; 3,423 persons were of foreign nationality as compared with 2,350 at the 1921 Census, representing an increase of 46 per cent. during the intercensal period as compared with an increase of 17 per cent. in the number of British Subjects , but as previously indicated the relative proportion of British nationals shows little change. Males of non-British allegiance increased by 41 per cent., and females by 72 per cent. The greatest increases were Italian, 857 ; Greek, 442 ; and Yugoslavian, 147 ; whilst those of French Nationality decreased by 140 and Chinese by 128.

Race.—99·5 per cent. of the population of South Australia were of European race at the 30th June, 1933 ; being the same percentage as at the previous Census. During the intercensal period the number of full-blood non-Europeans decreased by 33 per cent. and the number of half-castes increased by 72 per cent., the greatest increase being among the half-caste Australian aboriginals whose numbers increased by 94 per cent. to 1,570.

Industry.—The number of breadwinners, including pensioners, recorded in South Australia at the 1933 Census totalled 275,148, of whom 207,234 were males, and 67,914 females. Pensioners included in this total numbered 22,638, and, excluding pensioners, the breadwinners totalled 252,510, comprising 197,304 males, and 55,206 females.

The proportion of breadwinners, including pensioners, in the male population increased from 67·9 per cent. at the 1921 Census to 71·2 per cent., and female breadwinners from 16·1 per cent. to 23·4 per cent. The increased proportion of breadwinners among females is partly due to the increase in the number of old-age and invalid pensioners since the 1921 Census, as many would, in better times, have been maintained by relatives, and so classed as dependants. Excluding pensioners, and those for whom particulars were not stated, the number of breadwinners who were shown to be associated with some occupation or industry increased by 15·1 per cent.—males by 13·1 per cent., and females by 23·4 per cent.

Both in the year 1921 and 1933 the industrial group (factories) included the largest number of breadwinners, representing 29·9 per cent. at the 1933 Census as compared with 31·3 per cent. at the previous Census. The Agricultural, Pastoral and Dairying group constituted the second largest class and embraced 22·7 per cent. of the breadwinners at the 1933 Census as compared with 23·5 per cent in the year 1921. Next in numerical importance was the Commerce and Finance Group with a percentage of 18·4 at the 1933 Census, which is a substantial increase above the proportion of 15·2 per cent. in the year 1921. The percentage in Personal and Domestic Service remained the same at 9·7, but on the other hand the Transport and Communication group decreased from 9·6 to 8·7 per cent., and those engaged in Public Administration and Professional Occupations from 8·5 to 8·0 per cent. During the intercensal period the largest increase both in actual numbers and in percentage of increase was recorded in the Commerce and Finance group.

Since the 1921 Census the rate of increase in the number of female breadwinners has been higher than that of males in the great majority of groups, the principal exception being the Industrial (factories, construction works, &c.) group in which the percentage of females decreased from 12·7 in the year 1921 to 10·5 in 1933.

The proportion of females to the total number of persons engaged in the various occupational groups has increased as follows during the intercensal period, viz :—Agricultural, Pastoral and Dairying from 2·0 per cent. to 3·0 per cent. ; Transport and Communication from 3·1 to 5·4 per cent. ; Commerce and Finance from 21·4 to 24·9 per cent. ; Public Administration and Professional Occupations from 41·1 to 47·6 per cent. ; Entertainment, Sport and Recreation from 13·6 to 16·0 per cent. ; and Personal and Domestic Service from 80·4 to 82·3 per cent.

Grade of Employment.—The number of persons in South Australia who were of the wage-earning group as at the 30th June, 1933, was 183,851, or 31·6 per cent. of the total population of the State as compared with 30·2 per cent. at the previous Census. Of this number 123,075, or 66·9 per cent., were wage-earners in full-time employment at the date of the Census ; 13,035 persons, or 7·1 per cent. were employed part-time ; 43,740 persons or 23·8 per cent. were unemployed ; and 4,001 persons or 2·2 per cent. were helpers not receiving salary or wages.

Since the 1921 Census the number in the wage-earning group increased by 22·8 per cent. (males by 20·3 per cent. and females by 32·0 per cent.). Although employers increased by 67 per cent. to 22,407, this total was only slightly greater than the number of employers (21,078) recorded at the earlier 1911 Census. On the other hand, those working on own account without employing paid labour decreased by five per cent. to 29,916.

Unemployment.—The number of persons unemployed in the State of South Australia at the 30th June, 1933, totalled 43,740, being 23·8 per cent. of the number of persons in the wage-earning group ; 37,816 males were unemployed and 5,924 females, representing a percentage of unemployment of 26·9 for males and 13·7 for females respectively. It is of interest to note that this result for males is slightly less than the percentage ascertained from the returns supplied by Trade Unions in South Australia to the Commonwealth Statistician for the second and third quarters of the year 1933 ; the proportion of male members of unions unemployed being 30·2 per cent.

The corresponding figures of unemployment for the 1921 Census were—males 7·9 per cent., and females 4·1 per cent.

Of those unemployed at the 1933 Census, 1,260 males and 588 females who were under 21 years of age stated they had never been in employment.

Forty-one thousand six hundred and forty-five of the 43,740 persons unemployed stated the cause of their unemployment ; 92·2 per cent. being due to scarcity of employment and 5·3 per cent. to illness.

The results of the inquiry in respect of duration of unemployment show that 22·4 per cent. had been unemployed for less than 24 weeks ; 33·0 per cent. for less than one year ; 9·8 per cent. for a period of between one and two years ; 15·4 between two and three years ; 21·6 per cent. between three and four years ; and 20·2 per cent. over four years.

Income.—271,264 breadwinners in South Australia gave the required particulars concerning their income. As previously stated, 43,740 unemployed persons and 22,638 pensioners are included amongst the breadwinners ; 13·5 per cent. of the male breadwinners stated that they received no income during the year ended the 30th June, 1933 ; 25·6 per cent. received income less than £1 per week ; 18·0 per cent. between £1 and £2 per week ; 12·2 per cent. between £2 and £3 per week ; 11·4 per cent. between £3 and £4 per week ; 7·4 per cent. between £4 and £5 per week ; and 11·9 per cent. over £5 per week.

The corresponding distribution for female breadwinners was as follows ;—9·4 per cent. no income ; 46·8 per cent. under £1 per week ; 23·9 per cent. between £1 and £2 per week ; 11·0 per cent. between £2 and £3 per week ; 4·5 per cent. between £3 and £4 per week ; 1·7 per cent. between £4 and £5 per week ; and 2·7 per cent. over £5 per week. Including pensioners and unemployed, two-thirds of the male breadwinners (all ages combined) had incomes under £3 per week, and four-fifths of the females had incomes under £2 per week.

In addition to breadwinners, 22,342 persons, comprising dependants and those stating that the questions concerning occupation were not applicable to their circumstances, were in receipt of some income during the year ended 30th June, 1933, and of those, 69·2 per cent. received income less than £1 per week ; 18·0 per cent. between £1 and £2 per week ; and 12·8 per cent. more than £2 per week.

Statistical Register of South Australia, 1934-35.

Part IV.—TRADE, TRANSPORT, AND COMMUNICATION.

REPORT OF GOVERNMENT STATIST ON TRADE FOR 1934-35.

The values given herein of goods imported from countries beyond the Commonwealth represent the amount on which duty is payable, or would be payable if duty were *ad valorem*. The value of goods subject to duty is taken to be the fair market value in the principal markets of the country whence the same were exported, with an addition of 10 per cent. to such value to cover insurance, freight, and other charges to place of landing. The value of goods exported is in general the value in the principal market of the State in the ordinary commercial acceptation of the term. *See also notes at head of Returns* 21 *and* 23.

All figures in parentheses are those for the previous year, inserted for comparative purposes.

Imports (*British Currency Values*) totalled £3,965,808 (£3,679,412) an increase of £286,396, the total value averaging £6 15s. 9d. (£6 6s. 4d.) *per capita*. Although fairly heavy increases were noted in machinery, iron and steel, motor chassis, textiles, glass, and timber, these were reduced by decreased imports of bags and sacks, petrol, tea, and drugs and chemicals. The value of imports had fallen from £15,507,260 in 1926-27, to £2,821,538 in 1931-32, but increased to £3,760,324 in 1932-33 with a slight drop to £3,679,412 in 1933-34, and a further increase to £3,965,808 in 1934-35, the highest since 1929-30. The value of imports in Australian currency was approximately £4,957,000 (£4,599,000),

Exports (*Australian Currency Values*) totalled £11,834,784 (£12,718,325), decrease £883,541, the total value averaging *per capita* £20 5s. 2d. (£21 16s. 9d.). The prices for eggs, dried fruit, zinc concentrates, wool, sheepskins, wine, lead, and apples were lower than for 1933-34 and higher for wheat, flour, barley, and silver. The previous record quantities shipped (in parentheses) were exceeded in the following items:—Lamb, 8,227,157 (6,315,811) lbs.; eggs in shell, 4,429,318 (4,182,986) dozen; pork, 1,035,066 (754,748) lbs.; cheese, 2,359,107 (1,578,780) lbs. The following commodities have only been exceeded once:—Iron ore, 7,918,041 cwts. (11,604,841 cwts. in 1929-30); and salt, 219,311 cwts. (242,141 cwts. in 1933-34), the value of exports in British currency was £9,468,000 (£10,175,000).

BALANCE OF TRADE AND INTERSTATE TRADE.

Balance of Oversea Trade—The excess of exports over imports is estimated at approximately £5,502,000 (£6,496,000) in British currency, and £6,878,000 (£8,119,000) in Australian currency.

This balance is subject to qualification, as those intimately acquainted with trade statistics well know, but as many of the business public do not know, to avoid misunderstanding an explanatory note appears necessary.

The balance represents the result of the State's direct trade with oversea countries, but it includes Broken Hill products imported to this State and re-exported. South Australia only benefits on these to the extent of the added value as a result of treatment at Port Pirie and transit. South Australia does a heavy volume of trade with the other States, a complete record of which is unfortunately not available. If known it is probable that the adverse interstate balance would substantially reduce the oversea credit balance.

Interstate Trade of South Australia.

With the aid of the Railway and Harbour Departmental records and the courtesy of traders the Government Statist has for some time past been accumulating much useful data as to our Interstate trade, which indicates definitely that this State does a fairly substantial export trade to other States, as follows:—Wine and brandy, £620,613 (£552,437); motor bodies, £2,368,166 (£1,167,356); wheat, barley, and flour, £419,082 (£268,152); bark and salt, £128,291 (£126,431); and iron ore, £1,558,360 (£958,861). Substantial export trade is also done in metal manufactures, cheese, soap, bacon and ham, jams, leather, gypsum, &c. Not much information is available as yet regarding imports, but coal and sugar would total approximately £1,305,870 (£1,332,665), less exports of same to Broken Hill and Western Australia. Apparel and attire would probably be a heavy item, also livestock and wool. Timber from Western Australia in 1934-35 was valued at £155,373 (£112,268).—See Return Nos. 14 to 18.

Trade with Western Australia.

In Western Australia complete records are kept of Interstate trade. A review of these has been made and the results should be informative to the local traders doing business with that State. For the year 1934-35 Western Australia imported from the States £10,124,394, of which this State contributed

£873,418, or 8½ per cent. Cannot this proportion be increased in view of the closer geographical position ? With this objective the products of trade have been reviewed, and some are set forth as follows, with the South Australian proportion in parentheses :—

Butter, £132,331 (£1,219) ; cheese, £73,733 (£19,336) ; bacon and ham, £47,037 (£27,055) ; boots and shoes, £360,368 (£6,070) ; agricultural implements, £175,573 (£29,619) ; leather and leather manufactures, £79,422 (£10,370) ; pickles and sauces, £41,168 (£2,787) ; ale and beer, £161,910 (£23,181) ; jams and jellies, £124,588 (£9,177) ; biscuits, £6,700 (£1,581) ; confectionery, £217,762 (£6,375).

In many of the foregoing items this State might probably secure a greater proportion of the business. In the following items this State supplies either the total trade or nearly so.

Eggs in shell and pulp, £7,977 ; motor bodies, £109,585 ; brandy, £9,057 ; wine, £68,204 (total £77,146).

The balance of trade with Western Australia was in favour of this State for 1934-35 by £487,805 ; 1933-34 by £431,191 ; 1932-33 by £409,871 ; 1931-32 by £408,524 ; 1930-31 by £373,835.

Trade with Tasmania.

By the courtesy of the Tasmanian Statistical Office, details of the trade with this State have been supplied. For the year ended June 30th, 1935, the exports from South Australia to Tasmania were valued at £497,223 (£554,476) , and the imports into South Australia from Tasmania £295,431 (£246,902), a balance in favour of South Australia of £201,791 (£307,574). The principal lines were :—

Exports from South Australia to Tasmania.—Dried fruits, £8,355 (£9,090) ; ores, £287,563 (£382,972) ; wheat, £132,865 (£86,837) ; wines and spirits, £9,277 (£7,020) ; drapery, £5,933 (£6,602).

Imports into South Australia from Tasmania.—Calcium carbide, £1,779 (£8,829) ; cement, £3,149 (£2,993) ; fruits (fresh and preserved), £1,277 (£851) ; hops, £2,080 (£9,008) ; jams and jellies (£2,999) ; ores, £100,500 (£108,676) ; peas, £874 (£1,418) ; timber, £88,156 (£51,918).

DIRECT OVERSEA IMPORTS, 1934-35.

(For Alphabetical Index to Items see page 18).

No. 21.—Direct Oversea Imports into the State of South Australia from 1st July, 1934, to 30th June, 1935.

NOTE.—With the exception of Great Britain, New Zealand, and Australia, and in cases where a single country is concerned, only those countries are shown under each article where the value of imports exceeds £100.

Value of Imports.—The value of goods imported from countries beyond Australia is recorded in British currency and represents the amount on which duty is payable or would be payable if duty were *ad valorem*. Section 154 (1) of the Customs Act, 1901-1930, provides that "where any duty is imposed according to value, the value for duty shall be the sum of the following :—

(*a*) (I.) The actual money price paid or to be paid for the goods by the Australian importer plus any special deduction; or
(II.) the current domestic value of the goods, whichever is the higher;
(*b*) all charges payable or ordinarily payable for placing the goods free on board at the port of export; and
(*c*) ten per cent. of the amounts specified under paragraphs (*a*) and (*b*) of this subsection."

"Current domestic value" is defined as "the amount for which the seller of the goods to the purchaser in Australia is selling or would be prepared to sell for cash, at the date of exportation of these goods, the same quantity of identically similar goods to any and every purchaser in the country of export for consumption in that country."

Quantities.—Generally, but not invariably, quantities have been shown in the ordinary trade unit; where the cental is used, the unit equals 100 pounds avoirdupois. Where imports have been declared in packages without an indication being given of the number, capacity or weight, of the articles imported, the values only have been inserted.

N.E.I. means "Not elsewhere included."

Import Duties.—Duties charged on imports into South Australia are collected by the Commonwealth of Australia under various Acts.

DIRECT OVERSEA EXPORTS, 1934–35.

(For Alphabetical Index to Items, see Page 18.)

No. 23.—RETURN showing the Direct Oversea Exports from the State of South Australia for the Year 1934–35.

NOTE.—The difference between the quantities and the values of Australian produce exported and the total quantities and values exported represents the quantity and the value of produce of oversea origin re-exported.

Value of Exports.—The value of goods exported (including cost of containers) is recorded in Australian currency, and is generally the value in the principal markets of the Commonwealth in the ordinary commercial acceptation of the term, except for the following commodities, concerning which an alteration in the method of valuation of exports was made as follows :—

From July 1st, 1929, sugar (*a*) sold in Australia for export : The value f.o.b., at which the sugar is sold to oversea buyers ; (*b*) shipped on consignment : The f.o.b. equivalent of the ruling price of such sugar in the London markets. Goods on which bounty or rebate is payable on export : The value of the goods in the principal markets of the Commonwealth less the amount of any bounty or rebate.

From July 1st, 1930. Wool (*a*) sold in Australia for export : The actual price paid for the wool plus the cost of all services incurred in placing the wool on board ship ; (*b*) shipped on consignment : The f.o.b. equivalent of ruling Australian prices.

From July 1st, 1932. Wheat (*a*) sold in Australia for export : The f.o.b. equivalent of the price at which the wheat was sold ; (*b*) shipped on consignment : The f.o.b. equivalent of the current selling price oversea.

From April 1st, 1934. Butter (*a*) sold in Australia for export : the f.o.b. equivalent of the price at which the butter was sold; (*b*) shipped on consignment : the f.o.b. equivalent of the current ruling price overseas.

From July 1st, 1934. Flour (*a*) sold in Australia for export : The f.o.b, equivalent of the price at which the flour was sold ; (*b*) shipped on consignment : The f.o.b. equivalent of ruling Australian prices.

Exports of Australian Produce.—Articles which were partly or entirely manufactured from imported materials, raw material produced in the State and manufactures therefrom, are shown under this heading. No distinction is now made in the records between the produce of this State and that of other States of Australia, the whole being classified as Australian.

N.E.I. means " Not elsewhere included."

Ships' Stores.—Goods shipped as " Ships' Stores " on board oversea ships are not included in exports. For ships' stores see Table No. 19.

† Excluding £2,592,016 half-share of profits on resale of wool by Imperial Government to which the growers were entitled, under the sale agreement.

‡ Interstate trade in wool stocks and wool used in local factories, are factors which cause differences between figures for oversea export and for actual production.

NOTE.—In compiling the above tables, the mean rainfall in each agricultural county has been first obtained from all available records within or on the borders of the county, and then weighted by the area of the county to obtain the mean rainfall for each Division and the State. Counties Hamley and Young (Murray Mallee), Derby, Lytton, and Taunton (Upper North), and Manchester, Hore-Ruthven, and York (Western) being non-agricultural counties, are excluded in compiling the average rainfall for this return.

(*a*) Gross value is defined as the value placed on recorded production at the wholesale price realised in the principal markets Where primary products are absorbed at a local point or become raw material for a secondary industry, the value in each case is presumed to be the value at the principal market. Values include Bounties.

(*b*) Marketing Costs.—Freight, commission, containers, insurance, &c.

(*c*) Local value is gross value less marketing costs, being value at place of production.

(*d*) Production costs such as stock feed, seed costs, seed pickling, manures, spraying, dips, and power and water used in irrigation.

(*e*) Production Costs.—Depreciation of machinery and implements (Agricultural, 10 per cent., pastoral and dairying, 5 per cent.) and maintenance of buildings and fences (4 per cent. on estimated present value of buildings, &c., used for farm or station purposes, excluding residences).

(*f*) Net value is local value less production costs.

(*g*) Local value is also accepted as net.

(*h*) Gross value is also accepted as local and net.

FACTORIES AND WORKS.

A general review in the aggregate of the Secondary Industries of the State indicates considerable advance during the last three years, and a very satisfactory all-round increase over the previous year, 1933-34.

An analysis of 106 industrial groups shows increased productivity in 78 groups for 1934-35, as compared with 1933-34, whilst the remaining 28 with a few exceptions showed only slight decreases. There was an increase of 4,011 hands employed, of which motor-body building was responsible for 1,895.

Throughout this report and the statistical returns, the average number of persons employed means the average number over the whole year, unless otherwise stated. Consequently in tables relating to employment, and in the computation of average salaries and wages paid, production per employee, &c., the average number for the whole year is used, instead of the average number during period of operation.

The following summary shows the State grand totals for the last five years, with one year's increases or decreases :—

Salaries and Wages.—At a conference of Australian Statisticians held in 1924, it was agreed that where proprietors worked in the industry, thus occupying, as workers, positions for which they would otherwise need to employ and pay others, they be asked to show values as salaries for such services equivalent to what would have to be paid if employees were engaged in the same work.

For the year 1934-35, there were 1,393 (1,348) working proprietors, and salaries and wages on account of these were returned at £300,334 (£292,254), an average of £216 (£217). It should be remembered that in very many cases proprietors do not put their full time in the works section of their business.

The salaries and wages paid to all employees, including working proprietors, was £5,733,865 (£4,907,335) an increase of £826,530. This represents an average per employee of £171 3s. 6d. (£166 8s. 7d.). Males received £5,228,280 (£4,452,582), averaging £191 14s. 4d. (£187 10s. 8d.) ; and females £505,585 (£454,753), averaging £81 4s. 1d. (£79 3s. 8d.).

IV.—Total Value of Output and Production.

Output.—With few exceptions, this value is representative of the selling value at the factory of all work done during the year. As all selling and distributing costs are excluded from the costs of manufacture previously referred to under headings of salaries and wages, they are also excluded from value of output. For the year this output value has been returned at £25,699,172 (£22,919,297), an increase of £2,779,875.

Production Value.—The annual value of production is defined statistically as the value of consumable commodities produced during the year, deducting as far as possible the value of goods consumed in the

process of production. This represents the value added to material as a result of treatment, and is estimated for the year at £9,557,113, (£8,641,477) an increase of £916,636, or 10·60 per cent. and is equal to £16 7s. 3d. (£14 16s. 9d.) per inhabitant.

* Not collected 30th December, 1915, to 30th June, 1916.

Distribution of Gross Output Value.

The margin between the total expenditure on material, fuel, light, &c., used, salaries and wages paid (including working proprietors) and the selling value of the output accrues to the manufacturer to cover all overhead charges, depreciation, and profits. For every £100 of output this margin was £14 17s. 6d. (£16 5s. 10d.), a decrease of £1 8s. 4d. The distribution of each £100 is as follows :—Salaries and wages (including working proprietors), £22 6s. 3d. (£21 8s. 3d.) ; fuel, light, &c., £3 7s. 5d. (£3 12s. 2d.) ; material used, £59 8s. 10d. (£58 13s. 9d.) ; margin for all other expenses and profit, £14 17s. 6d. (£16 5s. 10d) Total, £100.
